

Build OpenSSL on Windows for Android

download msys2: https://github.com/msys2/msys2-installer/releases/download/2023-03-18/msys2-x86_64-20230318.exe

```
git clone git@github.com:openssl/openssl.git
```

```
cd some/where/openssl
```

```
git checkout openssl-3.0
```

```
git submodule init
```

```
git submodule update
```

```
create config.bat:
```

```
export ANDROID_NDK_ROOT=/c/Users/Jun.Zhang/AppData/Local/Android/Sdk/ndk/21.4.7075529
PATH=/c/Users/Jun.Zhang/AppData/Local/Android/Sdk/ndk/21.4.7075529/toolchains/llvm/prebuilt/windows-x86_64/bin:/c/Users/Jun.Zhang/AppData/Local/Android/Sdk/ndk/21.4.7075529/toolchains/arm-linux-androideabi-4.9/prebuilt/windows-x86_64/bin:$PATH
./Configure android-arm64 -D__ANDROID_API__=29
make
```

open MSYS2 and cd to some/where/openssl and execute `sh config.bat`:
